

WCD/ICCD 2025 🧡🧡

February is an important month for raising awareness about cancer, featuring two key observances: World Cancer Day (WCD) on February 4 and International Childhood Cancer Day (ICCD) on February 15, respectively.

MAHAK Charity Institute, as a full member of the Union for International Cancer Control (UICC), a member of International Society of Pediatric Oncology (SIOP), as well as a regional board member of Childhood Cancer International (CCI) engages in both ICCD and WCD campaigns by organizing awareness programs, fundraising activities, and advocacy initiatives. Through these efforts, MAHAK aims to raise public awareness about childhood cancer and continuously enhance cancer care for children and their families.

After each campaign concludes, MAHAK composes a report detailing its actions and initiatives, which is then published to share the outcome and inspire others. Click the box below to read MAHAK Special Report on WCD/ICCD 2025!
